

# Norman Cunanan

(949) 413 – 4891 | norman.cunanan17@gmail.com | Irvine, CA

## Summary

---

A result-oriented and extremely hardworking individual seeking a rewarding opportunity in the web development industry to effectively utilize education and skills while furthering professional experience and positively contributing to an organization.

## Education

---

### University of California, Irvine

*Full Stack Web Development | 2018*

### University of California, San Diego

*Bachelor of Science in Physiology and Neuroscience | 2013*

*Minor in Psychology*

## Project Experience

---

### Mentor MeetUp

Led the UX/UI design of the application flow. Responsible for the overall design for the front-end development using React, CSS, and Bootstrap. Built a sign-up form responsible for storing user/mentor information using MongoDB with Mongoose. Used packages from NodeJS package manager to create a search bar that displays mentor information.

### Tour Report

Built functionality to update database fields using Sequelize in order to display reviews of concerts. Responsible for overall UX design of application using HTML/CSS, Bootstrap and HandlebarsJS. Connected the frontend to the backend using RESTFUL APIs.

### Platypus Music

Responsible for developing AJAX calls to multiple APIs to retrieve music artist information. A contributor of using jQuery and Bootstrap in order to append music data on client side.

## Additional Experience

---

### Saddleback Memorial/GMPT, Mission Viejo, CA

*Physical Therapy Aide | January 2014 – July 2017*

Led, trained and groomed new employees to help assist incoming patients. Provided information to patients by answering questions and requests; allaying fear.
